

Product Environmental Profile

Air circuit breakers DMX³ up to 6300A - fixed version

LEGRAND'S ENVIRONMENTAL COMMITMENTS

• **Incorporate environmental management into our industrial sites**

Of all Legrand sites worldwide, over 80% are ISO 14001-certified (sites belonging to the Group for more than five years).

• **Involve the environment in product design**

Provide our customers with all relevant informations (composition, consumption, end of life, etc.).
Reduce the environmental impact of products over their whole life cycle.

• **Offer our customers environmentally friendly solutions**

Develop innovative solutions to help our customers to design more energy efficient, better managed and more environmentally friendly installations.

REFERENCE PRODUCT

<p>Function</p>	<p>The product is an automatic air circuit breaker 4P 2500 A 50 kA for the ahead protection and control of low voltage electrical lines with a maximum voltage of 690V a.c. Supplied with 4 auxiliary contacts: NO/NC and rear terminals for different connection with bars, the product must be equipped with an electronic protection unit, imperatively ordered together for factory assembly, enabling very precise adjustments of the protection conditions, while maintaining total discrimination with downstream devices. All protection units are equipped with batteries for powering in case of mains fault or when the breaker is open or not connected. PCR category: passive product. Life span considered for this study: 20 years.</p>

Air circuit breakers DMX³ up to 6300A - fixed version

■ CONSTITUENT MATERIALS

This product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. At the date of publication of this document, this product contains no substances to which the RoHS directives apply (2002/95/EC and review 2011/65/EU) and none of the 163 candidate substances covered by the REACH regulation dated 15/06/2015.

Total weight of Reference Products:	65703 g (unit packaging included)
--	--

Plastics as % of weight		Metals as % of weight		Other as % of weight	
Thermoset	13,2 %	Steel	33,7 %	Electronic cards	0,1 %
Polycarbonate	2,6 %	Copper alloys	21,0 %	Other electronic components	0,1 %
Polyamide	0,8 %	Aluminium	1,0 %	Batteries	< 0,1 %
Polycarbonate-ABS	0,2 %	Zamak	0,4 %	Packaging as % of weight	
Silicon rubber	0,1 %	Silver alloys	0,1 %	Wood	24,8 %
Other plastics	0,2 %	Other metals	0,3 %	Cardboard / Paper	1,1 %
				Steel	0,3 %
Total plastics	17,1 %	Total metals	56,5 %	Total other and packaging	26,4 %

Estimated recycled material content: 21 % by weight

■ MANUFACTURE

This product comes from sites that have received ISO 14001 certification.

■ DISTRIBUTION

The Group's products are distributed from logistics centres located to optimize transport efficiency.

The Reference Product is therefore transported over an average distance of 1000 km by road and 19000 km by ship, representing a marketing all over the world.

Packaging is compliant with european directive 2004/12/EC concerning packaging and packaging waste.

At the packaging end of life, its recycling rate is of 81 % (as % of packaging weight).

■ INSTALLATION

Installation components not delivered with the product are not taken into account.

■ USE

■ Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

■ Consumable

Two battery changes are necessary during the considered period (lithium ion button batteries - model CR2).

Product Environmental Profile

Air circuit breakers DMX³ up to 6300A - fixed version

END OF LIFE

Development teams integrate product end of life factors in the design phase. Dismantling and sorting of components or materials is made as easier as possible with a view to recycling or failing that, another form of reuse.

• **Recyclability rate:**

Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the product is estimated as 61 %. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:

- Plastic materials (excluding packaging): 4 %
- Metal materials (excluding packaging): 56 %
- Packaging (all types of materials): 1 %

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end of life of the product marketed and used all over the world. The following modelling elements were taken into account:

Manufacture	Unit packaging taken in account. As required by the «PEP ecopassport» programme all transports for the manufacturing of the Reference Product, including materials and components, has been taken in account.
Distribution	Transport between the last Group distribution centre and an average delivery to the sales area. The products are marketed all around the world. For the distribution distance, the rule of the current PCR has been adopted: worldwide transport (intercontinental): 19000 km by ship plus 1000 km by truck.
Installation	Installation components not delivered with the product are not taken into account.
Use	<ul style="list-style-type: none"> • Maintenance: under normal conditions of use, this type of product requires no servicing or maintenance. No consumables are necessary to use the product. • Product category: passive product. • Use scenario: continuous operation (100% of the time) for 20 years at 30% of rated load of the time. This modelling duration does not constitute a minimum durability requirement. • Energy model: Electricity mix Europe 2005.
End of life	In view of the data available on the date of creation of the document, and in accordance with the requirements of the PCR of the « PEP ecopassport » programme, was counted transport of the Reference Product by road only once, over a distance of 1000 km, to a processing site at end of life.
Software used	EIME V5 and its database «Legrand-2012-10-31 version 3» developed from database «CODDE-2012-07».

The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family.

Extrapolation rule for the products of the homogeneous family different from those of reference: the environmental impacts of the manufacture, distribution and end-of-life phases are proportional to the number of poles, the impacts of the installation phase are always null and the environmental impacts of the use phase are proportional to the number of poles and to the dissipated powers.

The values of these impacts are valid for the context specified in this document. They must not be used directly to draw up the environmental balance sheet for the installation.
