345530

Teleloop module to be used in conjunction with the display module Linea 5000 (345000). It allows people wearing hearing aids fitted with (T) selector to use audio door entry communication. In this mode, the hearing aid receives the audio signal directly from the amplification system, bypassing the microphone of the hearing aid itself, improving audio quality and reducing background noise. It is connected to the display module using the appropriate multicable supplied. To be completed with the appropriate finishing frame (available in 5 finishes) The device CANNOT be used stand-alone but only as additional module in conjunction with the Linea 5000 display (345000). To be installed in 1-module flush mounted box 350010 or with the dedicated accessory 345341 or 345342 for 3+1 composition.

Technical features

Brand	BTicino
Rated voltage	18-27 Vdc
Modules	1
Protection class	IP65
Dimensions	129x127x41 mm
Height	127 mm
Width	129 mm
Depth	41 mm
Plant type	2 wires
Robustness	IK08

Operating temperature	(-25) – (+70) °C
Connection type	BUS SCS
Series	LINEA 5000

Commercial data

Minimum quantity	1
Sales unit	1
EAN code	8005543746110
