

## 375001

The DES Server, combined with the IP DES PRO software, is designed for advanced configuration and management of the IP video door entry system. It must be installed under the building's VLAN network and allows centralized and simplified management of the entire installation. The IP DES PRO software enables the creation of the system topology, easily associating external units, concierge switchboard, and internal units through a scanning tool (e.g., barcode reader). The system supports access control management, including devices such as RFID cards and badges, fingerprints, and facial recognition. Additionally, IP DES PRO allows programming or modifying access permissions for new residents, viewing alarm logs, sending messages to video intercoms, uploading advertising messages and screensavers, and synchronizing time and date on all devices.

## Technical features

Brand	BTicino
Rated power (W)	15W
Dimensions	190x160x65mm
Height	160mm
Width	190mm
Depth	65mm
Plant type	IP
Operating temperature	-10° - +60°C
Series	IP Door Entry System

## Commercial data

Minimum quantity	1
Sales unit	1
EAN code	8005543698167
