

F461

bticino

4 DIN server that supports the use and integration of the 3rd parties systems. It has native protocol to provide local integration in 3rd party systems, for advanced Home Automations systems like for instance RTI, Crestron, Control4, Savant. It's the best solution for high level projects where MyHome is usually requested for the Wiring Devices. Use the Home + Project app to start configuring the server, while for the usage there will be the 3rd parties app. It cannot be used on the same installation with server item F460.
