The Smarter connected thermostat, together with the dedicated Thermostat APP, is a device which allows you to adjust and monitor the temperature in the rooms precisely and accurately; all the programming and most of the functions are performed simply and intuitively using the APP. Thanks to its Wi-Fi connection, Smarter can be programmed and controlled remotely; it can also display the temperature and humidity measured in the room. The temperature level can be set locally for manual operation and the Boost mode can be activated. The Boost forces the switching on of the system for a limited time (30, 60 or 90 minutes) independent of the measured and programmed temperature. It can also be controlled with Google and Amazon Alexa voice assistants. Features: - 100 ÷ 240 Vac, 50/60 Hz power supply; - 2 W max absorption; - maximum cable section 1 x 1.5mm²; - temperature measurement 5 ÷ 40°C; - temperature set-point 5 ÷ 40°C, - increase of 0.5°C; - 1-contact output in switching free of potential 5(2)A. Installation on the wall, using screws and dowels suitable for the installation surface (brickwork, plasterboard, tiles etc.).

Technical features

Brand	BTicino
Rated voltage	230Vac
Height	87mm
Width	126mm
Depth	28.1mm
Series	Connected objects

Technical documentation

? Radio Conformity Declaration	? User Manual
? Technical Data Sheet	? DWG drawing
? Instruction Sheet	

We, BTicino S.p.A Viale Borri 231 21100 Varese (Italy), declare that all items listed in BTicino catalogues, have been manufactured in compliance with the principal elements of safety objectives of European Directive said LVD: 2014/35/EU: 26 February 2014 and, where requested, also in compliance with essential protection requirements of electromagnetic compatibility according to European Directive 2014/30/EU: 26 February 2014, and/or where requested also in compliance with 1995/5/CE: 9 March 1999 "R&TTE" or where requested also in compliance with 2014/53/EU: 16 April 2014 "RED".
