

BTICINO &gt; Low voltage energy distribution &gt; Photovoltaic solutions &gt; String boxes

## F107DC4

Pre-wired string box for photovoltaic system. Distribution board for the protection and connection of the direct current circuit going from the photovoltaic generator to the inverter, for systems consisting of 4 strings. Pre-wired with cables for photovoltaic systems, they have MC4 type quick fit connector for the connection of input and output lines.

### Technical features

Rated voltage	1000Vdc
Series	Photovoltaic
