

BTICINO > Solution for energy efficiency > Supervision and measurement > Multifunction measurement control units

F4N200

Multifunction control unit RS485 (4 modules DIN35). Measures current, voltage and active and reactive power, energy, internal temperature, power factor, operating time, programmable alarms, LCD display, output for alarm signaling and pulse count

Technical features

Brand	BTicino
Standard reference	CEI 61557-12
Rated voltage	80-265Vac 100-300Vdc
Rated power VA	2.5
Rated power W	3.5
N° of modules	4
Protection index	IP54
Series	Measuring and supervision
