HD4434

Green Switch: switch with passive infrared movement sensor – brightness sensor with adjustable threshold and adjustable switch off delay time - manual switching on of the light using the front pushbutton, and automatic switching off based on brightness levels and movement – 2.5 A resistive/inductive relay output – 230 Vac power supply - 2 modules

Technical features

Brand	BTicino
Rated voltage	100÷240Vac
N° of modules	2
Contact type	2 x 2,5 mm ²
Series	Axolute
