

BTICINO &gt; Solution for energy efficiency &gt; KNX Automation System &gt; Devices for infrastructure

## 002650

KNX scenarios/events module It can be used in a KNX system for saving and recalling scenarios/ events. Main functions: Programming and recalling of 8 scenarios including up to 8 different actuations - Management of data types from 1 bit to 14 bytes - Saving and recalling of scenarios through 1 bit activation commands, or 8 bit scenario telegrams - Variable time delay for the forwarding of telegrams from 0 to 30 minutes, upon recalling of a scenario - Programming and recalling of up to 8 different events consisting of up to 10 activities maximum - Possibility of activation of events, based on reference values or conditions - Variable time delay from 0 to 120 minutes for each event Bus connection using a red-black KNX connector. Supply voltage SELV 29 Vdc from KNX bus. Fitting on DIN rail. Size 1 DIN module.

### Technical features

### Documentation

Brand	Legrand
Rated voltage	29Vdc
N° of modules	1
